

# How to Buy Kodex (KDX)

This guide will help you buy Kodex tokens (KDX) step by step. Follow carefully and always double-check links to avoid scams.

## 1. Install a Wallet

Download and install Phantom Wallet (or any trusted Solana wallet) on your browser or mobile device.

## 2. Buy SOL

Purchase Solana (SOL) from an exchange like Binance, Coinbase, or KuCoin, then transfer it to your wallet.

## 3. Connect to a DEX

Open Raydium or Jupiter DEX in your browser. Connect your Phantom wallet securely.

## 4. Swap SOL for KDX

Enter the official Kodex token mint address (only from trusted sources). Swap your SOL for KDX tokens.

## 5. Add Token to Wallet

In Phantom, manually add KDX using the mint address so your balance displays correctly.

## 6. Stay Safe

Only use official links. Avoid Telegram or Twitter DMs. Kodex will never ask for your private key or seed phrase.
